Summary

Enthusiastic UI/UX Designer with 6 months of hands-on experience, skilled in Figma, Photoshop, and Canva. Proficient in creating wireframes, prototypes, and visually appealing designs. Strong understanding of user-centered design principles with a focus on functionality and aesthetics.

Experience

UI/UX Designer

Tirunelveli, Tamil Nadu

Ascending Software

- Designed user-centric interfaces, improving usability and engagement across web and mobile platforms.
- Collaborated with cross-functional teams to create seamless, visually appealing designs aligned with user needs and business goals.
- Delivered responsive and modern designs using Figma and Photoshop, ensuring consistent branding and enhancing user satisfaction.

Education

Dr.Sivanthi Aditanar College of Engineering

Nov 2020 – May 2024

Bachelor of Engineering in Computer Science (CGPA: 8.5)

Sri Jayendra Swamigal Silver Jubilee School

Jun 2019 – Mar 2020

HSE 80.6%

Sri Jayendra Swamigal Silver Jubilee School

Jun 2017 – Mar 2018

SSLC 85.2%

Projects

Face Detection

- Developed a Face Detection project using React.js and a Java Backend, leveraging AI to match and identify people from a given photo. Implemented image analysis and recognition algorithms for accurate results

Digital Signature (SHA-256 Algorithm)

- A digital signature using the SHA-256 algorithm creates a unique hash of a message, ensuring its integrity.
- Java

Fuel Finder (Dijkstra Algorithm)

- A Fuel Finder in Flutter using Dijkstra's algorithm helps locate the nearest fuel stations by calculating the shortest path.
- Flutter, Firebase

Technical Skills
